PROJECT TITLE

Employee Performance Analysis using Excel

AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Our Solution and Proposition
5. Dataset Description
6. Modelling Approach
7. Results and Discussion
8. Conclusion

PROBLEM STATEMENT

Employee performance analysis:

Empolyee performance analysis is a systematic process to evaluate and individuals job performance,skills and organisation.
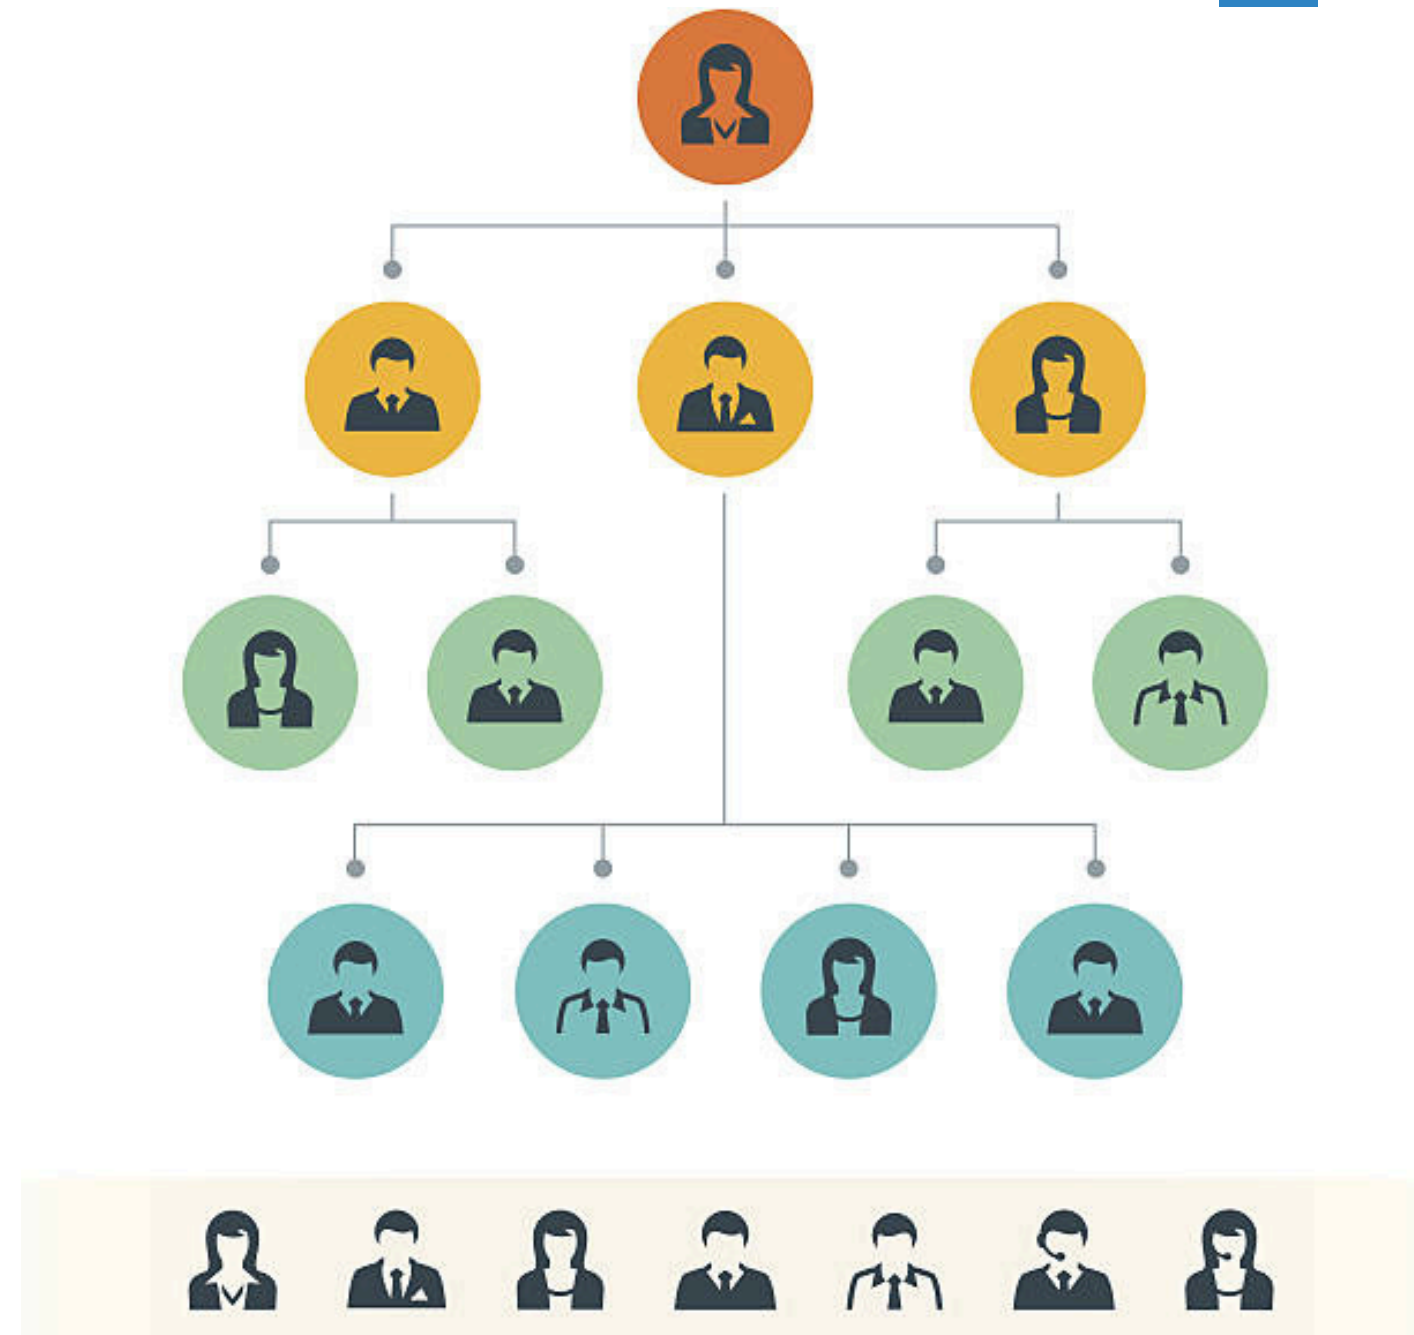

PROJECT OVERVIEW

- ## Performance analysis:

Performance analysis is the process of evaluating and measuring the effectiveness of a system, process or individuals.

WHO ARE THE END USERS?

OUR SOLUTION AND ITS VALUE PROPOSITION

1.Target audienc

2.Key benefit

3.Unique differentiater

4.Desirable outcome

A solution value proposition is a statement that clearly communicate the benefits ,value and unit differentiators it offers to customers and users.
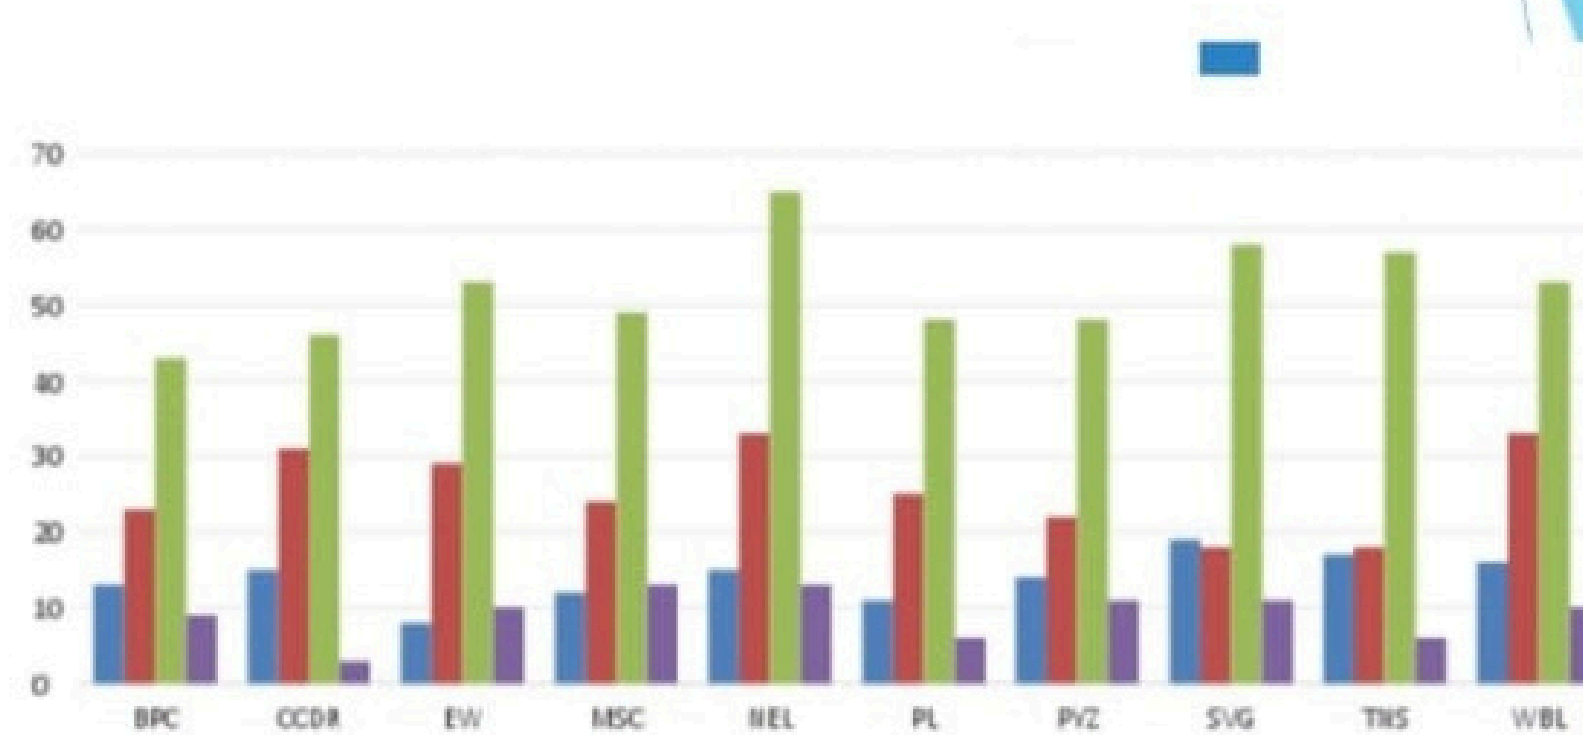

Dataset Description

Size and quality:

1. Provide details on the volume of data, the period covered, and any issues related to data quality or completeness.

2. A dataset description provides an overview of the data including its content ,structure and context.

MODELLING

Employee program analysis modelling involves using statistical and analytical techniques to evaluate the effectiveness of employee programs,such as training,development.

RESULT

conclusion

By addressing these areas, we can optimize resources, improve efficiency ,and drive growth.Regular monitoring and evaluation will ensure continued progress and success.
